# Acknowledgement

Firstly, we would like to express our sincere gratitude to our teacher Mr. Le Thanh Nhan for giving us the opportunity to conduct this project as well as the support and guidance he provided throughout the project so that it would be completed promptly and with high efficiency. This project is a simulation of a real-life workplace where we have to work as a team to develop a website to meet the requirements of our client. The project helped us to learn more about teamwork, coordination, self-motivation as well as our overall skill improvement in the field of website development.

Secondly, we would like to give our thanks to the team member of group 4, without whom this project could not have been realized. The teamwork and the enthusiasm of the member have brought life to the project. Each member has utilized his skill and knowledge in the field of website development, putting aside their differences to coordinate with each other in a highly efficient manner to achieve our common goal.

We hope that after this project, each team member will have gained invaluable experiences on how website development in real life is conducted, which serve as the first stepping stones for us to start our jobs after graduation. We also hope that the team will continue to improve their skills and knowledges to become successful in a highly competitive and ever-changing industry.

Last but not least we are very thankful to FPT Aptech HCMC, Aptech India and our family members for your continuous and indispensable supports on various aspect of our lives. We will make sure to make this project a great success as the way to show gratitude to everyone.

Yours sincere,

Members of Group 4.

# Synopsis

The objective Car Rental System project is to create a framework for a website of a company whose main business is rental service. Using the website, customers could browse and rent different items. On the management side, the administrative staff could receive rental orders, input data and extracting reports on a variety of involving entities. In addition, the implementation of the website also facilitates the process of car/driver deployment and management.

The project aims to create a simulation of a real-life project development process, and set a fundamental understanding on Java and PHP for the students in Semester II to develop larger and more complex projects in the future. The students are expected to utilize the knowledge they have acquired during class and from self-study for the project.

The entire project was conducted under the supervision of Mr. Le Thanh Nhan and should only be used for academic purposes.

# Problem Definition

Deluxe Rentals Co. Ltd. is an emerging name in the car rental service industries. The company provides rental vehicles from various brands and types that meet the requirements and expectations of even the most demanding clients.

Owning a garage that has the capabilities to provide services to 50 cars at once, all the company vehicles are always in the best conditions and readied to be delivered to our clients. The management staff is also professionally trained to make sure that all of the client's needs are provided, and they always try to find new ways to please the clients.

In addition to that, our driver staff which is strictly and carefully selected will ensure safe and pleasant travel throughout the journey. All the drivers, vehicles and clients are fully covered with insurance and all legal and safety requirements are met.

Deluxe Rentals has become more and more popular with a sharp increase in sales after only 1 year of establishment. In order to efficiently manage the rental orders as well as providing a convenient, easy-to-use platform of booking for the clients, the company decided to develop a website which provides the following functions to the clients:

- ✓ Provide member registration feature. After registration, the clients could start booking rental cars.
- ✓ Provide information of the rental vehicles to clients and members.
- ✓ Provide shopping cart function to book multiple vehicles at once.
- ✓ Receive feedbacks from clients and members to improve service quality as well as product quality.

On the administration side, the website includes an Admin Control Panel (ACP) that supports the following management functions:

<b>Effective Date:</b> 20-08-2021	<b>Version</b> 1.0	<b>Page No:</b> 8 of 62

- ✓ Provide the functions to manage records of clients, staff, vehicles.
- ✓ Provide the function to check booking details.
- ✓ Provide the function to view reports.

### **The Role of User, Staff and Admin:**

#### **1. User:**

- ✓ Can register as a member and manage personal account.
- ✓ Can view and booking vehicles.
- ✓ Can give feedback regarding the service.
- ✓ Can view their orders.

#### **2. Staff:**

- ✓ Can view client/vehicle information
- ✓ Can check contract details.
- ✓ Can reply to feedback of clients.

#### **3. Administrator:** Same roles as staff but with the following additions:

- ✓ Can view/ add / edit / delete records of clients, staff, vehicles.
- ✓ Can view report statistics.

# Customer Requirement Specifications

Description of the processing requirements for each target user.

## 1. Clients:

### ❖ Input:

- Member registration information.
- Request vehicle information.
- Book selected vehicles.
- Feedback about the service.

### ❖ Process:

- Process customer registration information.
- Search vehicles from database by brand, by type.
- Process client orders.
- Process client feedback.

### ❖ Output:

- Notification of successful registration.
- Display vehicle information.
- Notification of successful order booking.
- Notification of successful feedback submission.

## **2. Management Staff:**

### **❖ Input:**

- Staff/Administrator login information.
- Client, vehicle, staff information to add / edit / delete. (Admin only)
- Member/order information to be display.

### **❖ Process:**

- Processing login information.
- Add / edit / delete client, vehicle, staff information.
- Search member/order information.

### **❖ Output:**

- Notification of successful login.
- Notification of success/ failure for the addition / edit / deletion of client, vehicle, staff information.
- Display member/order information.
